COMPANY PROFILE

# About Us

**Hadnath Consulting LTD (HCL)** is an engineering-oriented company committed to delivering premium solutions in power, renewable energy, process automation, telecommunications, infrastructure, and information technology. We have been in operation since 2012 and was incorporated in the year 2019 hence, we have been in operation for over 10 years offering excellent engineering services for industries. As one of the fast-growing engineering services providing company, we have established our footprints all over Nigeria and outside. One of our key strength is the team of skilled and highly resilient professionals committed to deployment of world class engineering services to our teeming clients manufacturing, banking, telecommunications, oil & gas, and real estate, among others. We are committed to providing safe working environment for our clients and staffs. Over the years, we have been trusted by our clients for our ability to efficiently deliver quality services within the allotted time frame. Innovation and creativity are our key cultures that enables us to deliver exceptional engineering services in resource constrained environment.

## MISSION AND VISION

- ✓ Our mission is to create a client-centered engineering service delivery company committed to standard, and timely delivery through professional and resourceful personnel.
- ✓ Our vision is to be the leading and preferred engineering service rendering company with a focus on meeting the clients' diverse needs.

## Core Values

### Service:

- ✔ At Hadnath Consulting Limited we are committed to excellent service delivery by clear understanding of the clients' needs.

### Creativity and Innovations:

- ✔ We rely heavily on creative and innovative approaches to provide value added services for our clients.

### Learning and Training:

- ✔ To keep up with the fast changing trends in technology, we embrace learning, training and re-training.

### Integrity:

- ✔ We deliver optimum service with our clients' needs in focus through transparent process

### Hardwork:

- ✔ We are conscious of imperativeness of timely delivery projects hence, we work hard to satisfy our clients' needs.

## OUR SERVICES

- Process and Power System Automation
- Clean Power Services
- Procurement and Installation of Power Generating Systems
- Design & Deployment of LV Panels
- Procurement and Deployment of Power System Infrastructures
- Industrial and Residential Building Services (M & E)
- Design and Deployment of Renewable Energy Systems (solar)
- Precision Cooling Systems
- Design and Deployment of HVAC Services
- Enterprise IT Solutions
- Design, Deployment, and Integration of Data Center System
- Data Centre Management Services
- Power Audits
- Turnkey Power Projects

## INSTRUMENTATION, AUTOMATION & SCADA SOLUTIONS

Automation provides means of controlling and regulating all the circumstances using process variables. It makes it possible to control the property and the conditions prevailing in industrial plants thereby industrial plants can be monitored by the automation system. Our SCADA systems, gain real-time visibility and control over your industrial processes. Monitor critical parameters, collect, and analyze data, and make informed decisions to maximize efficiency and maintain optimal performance. Our solutions provide you with the tools to stay ahead in a rapidly evolving industrial landscape. Our services range from electrical automation to process automation in industries starting from design, equipment supply, and installation to the deployment in the following;

- PLC/SCADA Systems
- Process Data Management
- E&I Construction Services
- I&C Field Services

Our teams are certified and licensed to fulfill the criteria defined by various regulatory bodies to ensure that the quality of the work is at the professional level.

## CLEAN POWER SERVICES

Operational efficiency of a number of industrial equipment is reliant on Clean Power. At Hadnath Consulting, we offers a range of Clean Power Services solutions and support systems designed to facilitate the generation, integration, distribution, and management of electricity. These services are targeted at optimal operation of industrial equipment, reduction of environmental impact, and improving energy efficiency, and accelerating the transition to a low-carbon future. At Hadnath Consulting, we offer the following clean power equipment:

- Uninterruptible Power Supplies (UPS)
- Automatic Voltage Regulators (AVR)
- Isolation Transformers
- Active Power Filters
- Capacitor Banks

## PROCUREMENT AND INSTALLATION OF POWER GENERATION SYSTEMS

Power is crucial for running of day to day operations of residencies, industries, and organizations. The **procurement and installation of power generating systems** which ranges from traditional diesel or gas generators involves the end-to-end process of sourcing, delivering, and setting up equipment that produces electricity. From needs assessment to feasibility study through system design to procurement and installation, and commissioning to training we offer our technical expertise as a culture. This process ensures delivery of reliable and sustainable energy system to ensure you get value for your money.

## DESIGN & DEPLOYMENT OF LV

Having an efficient power generation system, electrical panels play a pivotal role in safely managing and distributing electricity for residential, commercial, and industrial facilities usage. The design and deployment of electrical panels involve the creation and installation of electrical distribution boards through the following process namely; system design, panel fabrication, testing for quality assurance, deployment and commissioning. Our designs incorporates automation and protection scheme for electrical equipment thereby ensuring safe, reliable, and efficient power distribution for a wide range of applications.

## PROCUREMENT AND DEPLOYMENT OF POWER SYSTEM INFRASTRUCTURES

Power system infrastructures procurement and deployment encompasses the end-to-end process of sourcing, installing, and commissioning essential components of an electrical power network which may include transmission lines, transformers, switchgear, substations, control systems, and related civil works. Our efficient designs and deployment At Hadnath Consulting guarantees resilient, scalable, and sustainable power delivery systems. Based on the process that involves needs assessment & planning, procurement, logistics, installation & deployment, testing & commissioning our projects matches international standards. This process is central to grid capacity expansion, system reliability improvement, and grid integration of renewable energy sources.

## DESIGN AND DEPLOYMENT OF RENEWABLE ENERGY SYSTEMS

Considering that renewable energy plays a significant role in achieving energy transition goal, Our design and deployment of renewable energy solutions at **Hadnath Consulting** involve creating sustainable power solutions that leverages renewable resources to generate electricity with zero. The design of sustainable renewable energy solution involves site assessment, load analysis, system sizing, installation and commissioning of renewable energy solution. Whether for residential, commercial, or industrial use, our designs of renewable energy solution incorporates monitoring and routine maintenance for sustainable clean energy transition.

## PRECISION COOLING SYSTEMS

Cooling systems has become an essential component in modern facility management and are pivotal to continuous operation of data centers, server rooms, telecom facilities, and medical laboratories. These systems are specialized climate control solutions designed to maintain stable environmental conditions in sensitive spaces where precise temperature and humidity control is critical for the protection of high-value electronic equipment. Unlike standard air conditioning, precision cooling systems offer high accuracy, continuous operation, efficient air distribution and energy efficiency to ensure system reliability, minimized downtime, and extended life span of critical equipment.

## DESIGN AND DEPLOYMENT OF HVAC

The heating, ventilation, and air conditioning (HVAC) has become an industry standard in facility deployment. The HVAC services involve the planning, installation, and commissioning of systems for the purpose of regulating indoor climate and air quality across residential, commercial, and industrial buildings. Our design and deployment process focuses on delivery of energy-efficient, reliable, and comfortable environments personalized to specific building requirements. Using advanced technologies, our HVAC design and deployment ensure year-round comfort, enhanced indoor air quality, and cost savings through optimized energy use.

## ENTERPRISE IT SOLUTIONS

In today's fast-paced digital landscape, enterprise IT solutions are key to streamlined processes, seamless collaboration, and cutting-edge competitiveness. Enterprise IT solutions comprise of a broad range of technology services and infrastructure designed to provide support for the complex needs of your businesses and organizations. These solutions aim to improve operational efficiency, enhance data security, and support digital transformation through integrated systems and services.

We worked with OEMs and Partners to achieve robust IT Solutions in technology consulting, integrated networks, and hosted services to private and public sector organizations. They also consultants and engineers are committed to providing impartial advice, reliable solutions, and extensive after sales support at very competitive rates. Our support and solution include:

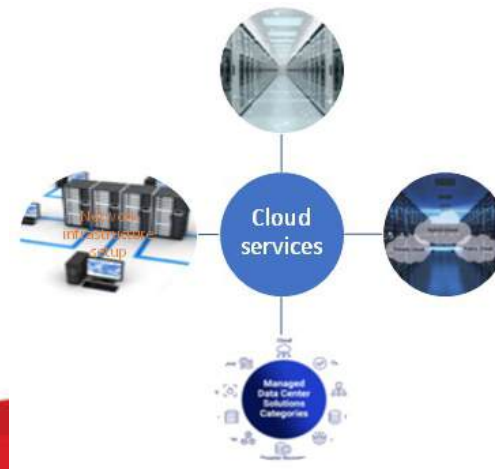

- Managed IT Services
- Network Infrastructure Setup
- Cybersecurity
- IT Consulting

## DATACENTER AND CLOUD SERVICES

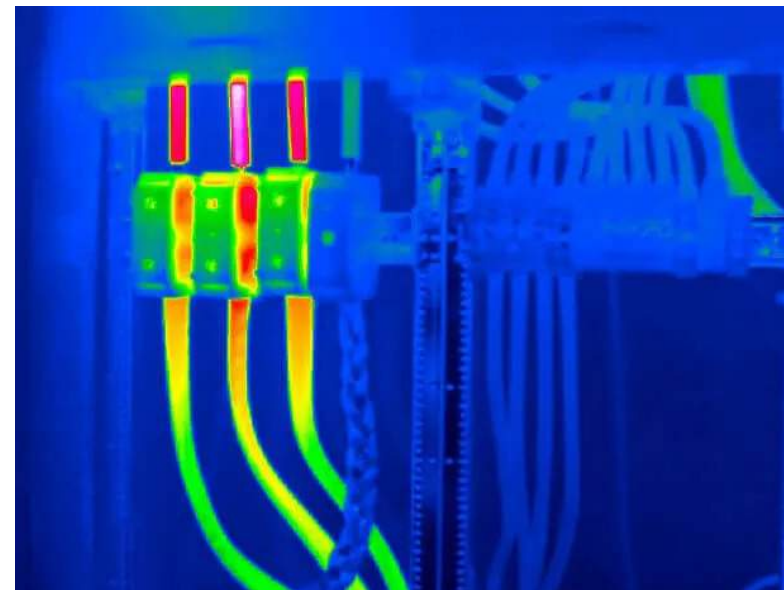

Our solutions from premier service providers will deliver a seamless cloud experience. Your employees are liberated to focus on what matters the most - your business and clients. Also, migrating data to the cloud, from on-premises, allows you to massively reduce your CapEx and OpEx. We guarantee complete flexibility for your IT services. Big data can be stored and processed completely in the cloud or there can be a hybrid approach to process data offline and then warehouse in the cloud during off-peak hours. We provide these services with aim of ensuring data integrity, minimize downtime, and support digital growth with reliable infrastructure for your organizations. Our core services include:

- **Design & Planning:** Development of efficient layouts with optimal power, cooling, and space utilization, ensuring scalability and energy efficiency.
- **System Integration:** Seamless deployment of servers, storage, networking, and power systems tailored to business needs.
- **Management & Monitoring:** 24/7 operational support, preventive maintenance, and real-time monitoring to ensure uptime and performance.
- **Security & Compliance:** Implementation of physical and cybersecurity measures aligned with industry standards and regulatory requirements.

## POWER AUDITS

At Hadnath Consulting, we are poised to providing comprehensive assessment and analysis of energy utilization and efficiency of a facility. This reveals how energy is used across various sections like heating, cooling, lighting, and machinery, with a focus on identifying areas where energy wastage occurs and the possible improvements that can be made. Our team of experience and certified consultants are equipped to conduct power audits of your organization with a sense of providing you actionable insights capable of reducing energy bills.

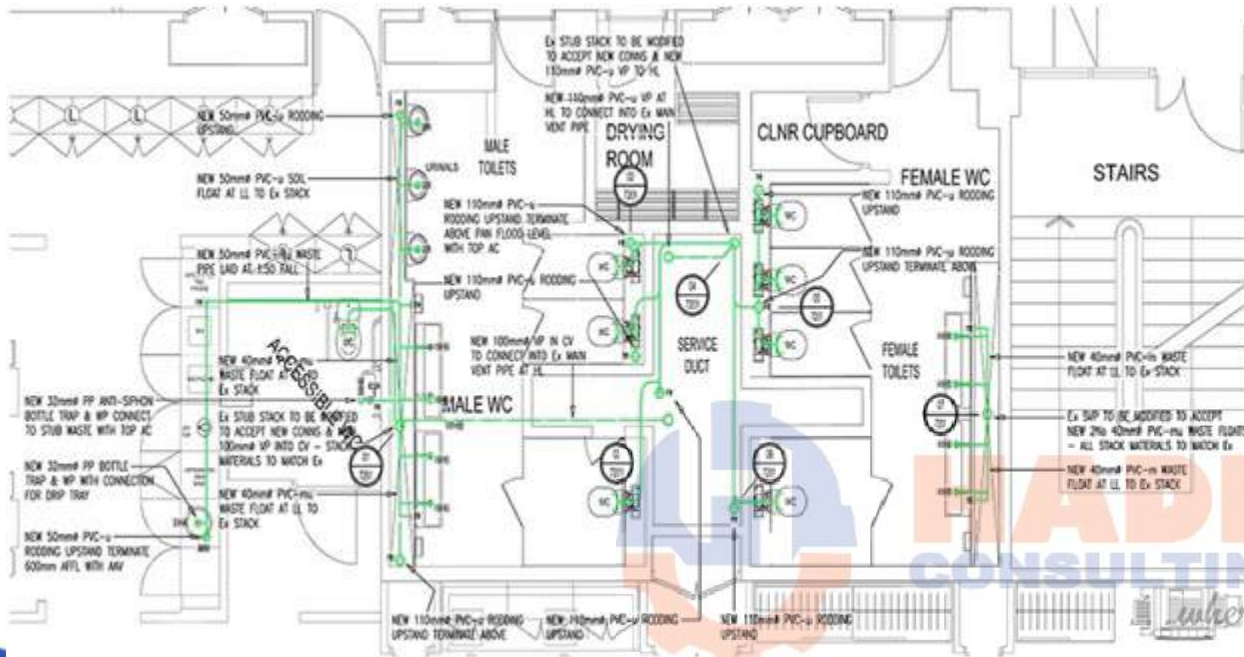

## M & E SERVICES

At Hadnath Consulting Limited we designed mechanical and electrical (M&E) services for both industrial and residential building projects tailored towards functionality, comfort, and safety. These services encompass the design, installation, and maintenance of essential systems that support everyday operations and living. Our M&E services are code-compliant, operationally efficient, and future-ready, contributing to long-term value and reduced environmental impact.

### Our core M&E services include:

- **Electrical Systems:** Power distribution, lighting, emergency backup systems, and energy management solutions.
- **Mechanical Systems:** HVAC (Heating, Ventilation, and Air Conditioning), plumbing, fire protection, and elevators.
- **Integration & Automation:** Smart building technologies, security systems, and building management systems (BMS).

## POWER SOLUTION:

We provide EPC and O&M contractor services for a full spectrum of solar power and storage applications, ranging from standalone systems to complex hybrid projects for Utilities, Industries, and other facilities. At HC Limited we believe in sustainability, and this permeates our work right from pre-design through to design, engineering, procurement, and project management till the close out and successful handover of the project. We continue to partner with product innovations to deliver power systems that are both economical and eco-friendly.

Our support includes:

- Energy Generation (415kV, 11kV and 33kV)
- Renewable Energy
- Mobile Substation

## LIST OF PROJECTS EXECUTED

1. LV Panels (4000A, 2500A, MCC (Motor control Panels), synchronization panel, 630A Panel) and distribution boards

**630A Distribution Panel**

**Motor control Center Panel**

**Starters for Pumps**

## 2. SUBSTATIONS

**Mobile substation for MCC Panel  
(Drive, LV Panel and Transformer)**

**2500kVA 11kV Packaged substation  
(Transformer, 11kV SWG, LV Panel)**
